**Subject:** Re: 10.9 Tomorrow

The river is staying up there, isn't it?

Right now the plan for tomorrow (Wednesday) is to remove the stone from south of the No Dredge Zone and possibly do some sand and AquaGate replacement in that area. Ben has been invited to go on the boat tomorrow to witness any of the work that does occur. He will be picked up from shore around 8 AM and the work is expected to occur during the morning hours.

Let's hope the flow starts to decline soon so we can get back to panel placement!

Stan,

The flow isn't really going down much at the dam. Do you anticipate panel placement tomorrow?

Mike
